

October 30, 2015

Dear Mr. Hughes:

As a non-profit theatre company that trains youth and their families, we constantly need to work at keeping our costs down. For years, we have felt the extreme heat of the summer and the harsh cold of the winter in our theatre space, in addition to the strain it placed on our budget.

I am so grateful to report that we've noticed a dramatic difference in the temperature in the theatre since you completed your work on our roof. We are still amazed at how the Epoxy treatment you used greatly impacted the temperature in the space. The room remains very cool without the air conditioning on.

I am writing simply to thank you for doing such a great job on the roof, which is helping us to carry out the work that is so important to many in our community in a more efficient manner. Please do use us as a reference and I hope to see you soon at the theatre.

Sincerely,

Benjamin Myers
Executive Director
